Dr. **Tomasi Cristiano**, graduated in 1991 from Verona University, Italy in dentistry. After attending a course in Periodontology and Implantology at the Ardec private school in Rimini, Italy, he attended post-graduate school at Göteborg University, Sweden, and was awarded a certificate as specialist in Periodontics in 2002.

In 2003 he became a Master of Science in dentistry at Sahlgrenska Academy at Göteborg University, Sweden where he led a study on the use of local antibiotics in the treatment of chronic periodontitis with focus on smokers.

In 2005 he won the first prize EFP (European Federation of Periodontology) for his research in periodontology with the publication of the study-paper: "Locally delivered doxycycline improves the healing following non-surgical periodontal therapy in smokers" published in 2004 on the "Journal of Clinical Periodontology".

Currently, he is fellow researcher at the department of Periodontology at Sahlgrenska Academy in Göteborg with Prof. Jan Wennström acting as tutor for his PhD studies. He is working on a research project regarding different approaches to non-surgical treatment of chronic periodontitis. He is also participating in a number of clinical studies regarding new implant surfaces and surgical protocols.

He has published various scientific papers regarding periodontal treatment in peer-reviewed international journals. He is lecturing at the post-graduate training in Periodontology in Göteborg and at the private school of Periodontology and Implantology Ardec in Rimini, Italy and on the post-graduate course in Implantology of Padova University, Italy. He has lectured at various national and international congresses across Europe.

He is an active member of Italian Society of Osseointegration (SIO) and member of the Italian Society of Periodontology (SidP).

He has been working in a private practice in Trento, Italy from 1992 doing periodontal and implant surgery exclusively, while also working as a consultant in surgery for other dental practices in Italy.
